Each day the hair is neglected means that the scalp \$ just a little worse than it was the day before. If you are indifferent about your hair and let it take care of itself, you should not complain when it becomes unsightly, or leaves you entirely. People who care for their health and personal appearance, now try to save their hair, and Newbro's Herpicide enables them to do this, surely, and in a very pleasing manner.

It is the first scientific HAIR-SAVER, and it is growing wonderfully in popularity. It acts by destroying the tiny vegetable growth in the scalp (the dandruff germ) after which the hair will grow as nature intended, unless the use of the remedy has been delayed too long. Remember that the dandruff germ may be planted in the scalp months or years before its presence is suspected. The first injury is dullness, dryness, or excessive oilness, followed by dandruff, itching scalp, and finally falling hair,

Much can be done toward escaping the dandruff germ without the use of remedies. Information upon this subject will be mailed free upon request, to those who send stamped envelope for reply, to the Herpicide Co., Detroit, Mich.

A Good Report

"Before using Herpicide I was constantly annoyed by itching of the scalp and dandruff came off in large scales each time I combed my hair. I have used one bottle of Newbro's Herpicide and the itching sensation is over and dandruff is almost a thing of the past. I had been troubled with dandruff many years."
